Sunbeam's safety precautions

SAFETY PRECAUTIONS FOR SNOWY THE FROZEN DESSERT MAKER.

- This appliance is not a toy.
- Always operate on a flat surface.

- Do not place freezer canister or motor unit in a dishwasher.
- Do not place motor unit in the freezer

Sunbeam are very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercise care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:

- Read carefully and save all the instructions provided with an appliance.
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug – do not pull the cord.
- Turn the power off and remove the plug when the appliance is not in use or before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- Close supervision is necessary when your appliance is being used near children or by infirm persons.
- Never leave an appliance unattended while in use.

- Young children should be supervised to ensure that they do not play with the appliance.
- Do not use an appliance for any purpose other than its intended use.
- Do not place appliance on or near a hot gas flame, electric element or on a heated oven. Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench or touch any hot surface.
- For safety reasons and to avoid maintenance by unskilled persons, some appliances are 'sealed' using tamperproof screws. Such appliances should always be returned to the nearest Sunbeam Appointed Service Centre for adjustment or repair if required.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.

If you have any concerns regarding the performance and use of your appliance, please visit www.sunbeam.com.au or contact the Sunbeam Consumer Service Line.

Ensure the above safety precautions are understood.

Features of 'Snowy' your frozen dessert maker

On/Off switch
Indicates when the unit is switched on.

Motor unit
Rotates the paddle.

Pouring hole cover
Enables easy pouring of ingredients during the freezing process and its transparency allows observation of the ice cream making process for perfect results every time. Pouring hole cover holds the motor unit in place.

Paddle extender
Connects the paddle to motor unit.

Paddle
Churns mixture until the right consistency is achieved.

Top & bottom canister latches
Interconnect to support motor unit cover.

Freezer canister
The freezer canister has been specially designed to freeze quickly in your freezer and provide an even temperature throughout the freezing process.

Non-slip rubber feet
Non-slip rubber feet provide extra stability.

Ice cream scoop

Before using your frozen dessert maker

1. Before using your frozen dessert maker for the first time, ensure that all packing material is removed.
2. Wash the freezer canister, pouring hole Cover, Interconnecting canister latches and paddle in warm soapy water. Be sure to rinse and dry all parts thoroughly.
3. Place freezer canister in the centre of the bottom canister Latch. Pull bottom canister latch upwards until connecting tabs click into place. Use the oval symbol on the freezer canister and oval cutout on bottom canister latch as a guide to alignment.

4. Next, position Top Canister Latch on top of Bottom Canister Latch and click into place.

5. It is important when making frozen desserts that the freezer canister is properly frozen. The frozen dessert maker features a double insulated bowl which requires thorough freezing. For best results, the freezer canister should be wrapped in a plastic bag and placed upright in the back of the freezer, where the temperature is the coldest. Wrapping the freezer canister with a plastic bag will prevent odours from within the freezer, seeping into the freezer canister. As there is liquid in between the Canister walls, shake the Canister to check the ideal freezing condition; you should not hear any liquid moving within the walls.

NOTE: Continually storing the freezer canister in the freezer allows you the flexibility to make your favourite frozen dessert at a moment's notice.

AVERAGE FREEZER TEMPERATURE	APPROXIMATE FREEZING TIME
-18°C	22-24 hrs

NOTE: The freezer temperature may vary depending on how many times it is opened throughout the day.

Using your frozen dessert maker

1. Slide the motor unit onto the pouring hole cover until it locks in place. Two tabs underneath will 'click' into place.

2. Insert the Paddle extender into Motor Unit Opening.

3. Connect the paddle to the paddle extender.

4. Remove the freezer canister from freezer.

5. Place the motor unit and cover together on top of the freezer canister so that all 3 locking tabs are aligned. These tabs are located at the front and sides of the unit.

6. Rotate the cover clockwise slightly until the tabs snap into place.

7. Insert the plug into the power outlet, then turn the frozen dessert maker on immediately. This will prevent the paddle from freezing onto the freezer canister.
8. Pour the prepared frozen dessert mixture through the pouring hole into the freezer canister.

NOTE: It is extremely important that the freezer canister be used immediately after it is removed from the freezer as it begins to thaw once removed. Ensure the frozen dessert mixture is ready and well chilled, then remove the freezer canister from the freezer.

9. The dessert making process will take anywhere from 12-40 minutes. Do not turn appliance off during use as the mixture may freeze and prevent the movement of the paddle.

NOTE: If after 40 minutes the mixture is not yet solid or has thawed again, do not continue. Possible reasons for the mixture not freezing include: the freezer canister was not cold enough, the mixture was too warm, room temperature is quite warm or the proportion of ingredients were incorrect.

10. To add ingredients after the mixing process has begun, gently add them through the Pouring Hole.

11. To avoid overheating the motor, the direction of the paddle rotation will change if the mixture becomes too thick. If the direction of paddle rotation continues to change, the mixture is completely prepared and the frozen dessert maker should be turned off immediately.

12. Remove the paddle from the mixture.

13. Allow the mixture to sit in the freezer canister for 5 minutes before serving. Only use plastic, rubber or wooden utensils to serve from the Canister bowl. Metal spoons may damage the bowl.

NOTE: At this stage your frozen dessert will be a spoonable consistency.

14. To further harden the mixture, transfer your frozen dessert into an airtight container and place in the freezer.

Handy hints when using Snowy

- The time taken to make a frozen dessert will depend on the ambient temperature of a room, how long the frozen dessert maker has been freezing, the temperature of the freezer and the temperature of the ingredients added to the frozen dessert maker. As a general rule, the cooler these elements, the faster the dessert making process. The churning process of Snowy will take anywhere from 12 minutes to 40 minutes based on this.
- When following recipes that require the mixture to be pre-cooked, it is best to prepare the mixture a day in advance to allow maximum chilling time.
- When preparing dessert mixtures that do not require pre-cooking, we recommend using an electric mixer for maximum aeration, then making sure mixture is very cold before churning.
- The consistency of the ice cream/sorbets should be a spoonable consistency when finished. We recommend however, transferring your ice cream to a container and placing in the freezer for a further 1-2 hours for a firm ice cream.
- Foods such as cream, sugar, eggs and milk are often the key ingredients in an ice cream mixture. They may be substituted with similar ingredients to suit your taste and dietary requirements. For example, different varieties of cream may be used, which will produce varying flavours and textures.
- Due to an increase in volume during preparation, the maximum amount of liquid mixture should not exceed 850ml. If using your own recipes, adapt the volume of mixture to these amounts. 850ml of mixture will create approximately 1 litre of ice cream; however sorbets do not expand as much therefore making a smaller quantity.
- Alcohol inhibits the freezing process. If adding alcohol to a recipe, add when the mixture is almost frozen. The best way to judge this is when the mixture reaches the top of the paddle.
- Be aware that flavours of fruit based sorbets and ice creams may vary depending on the ripeness and sweetness of fruit or juice used.
- You can replace sugar with an artificial sweetener. We recommend using one that is in equal proportion (spoon to spoon) to sugar, such as Equal or sweeteners that suggest using half the amount of sugar such as CSR Smart sugar.
- When storing your frozen dessert, ensure the container is no larger than 1 litre and well sealed. Placing a piece of baking paper over the ice cream will prevent ice crystals from forming on the ice cream.
- Frozen desserts are best consumed within 1 month after making them.
- When serving ice cream straight from the freezer, allow the ice cream to sit out at room temperature for 5-10 minutes; this will make serving easier.

Tips to making custard based ice-cream

A traditional creamy ice-cream is made from a custard base. Here are some steps to help you achieve perfect custard every time.

- Make sure the eggs are fresh and are at room temperature.
- Have your ingredients measured out and ready so that you are not leaving anything waiting.
- Using a wire whisk or electric hand mixer, beat the egg yolks and sugar in a large deep bowl for about 3-4 minutes or until light and creamy. The colour will go quite light.
- Place the milk/cream required for the recipe in a saucepan.
- Heat the milk mixture on a low/medium heat until the mixture looks like it is almost about to boil. A good guide is when little bubbles start to appear around the edges of the milk. Be careful not to boil. Should you boil the milk you will need to start again.
- Using a wire whisk, whisk the hot milk mixture gradually into the egg mixture making sure that the two are well combined.

- Return the mixture into a clean saucepan and cook over a low heat, stirring constantly with a wooden spoon. The custard mixture is ready when it thickens and coats the back of a spoon. To test this place the wooden spoon into the custard mixture then turn the spoon over. Run your finger once down the back of the spoon. If the custard is thick enough it will keep the finger mark, if it is still runny the mixture will either not grab onto the back of the spoon and look very thin or the finger mark will not stay.
- If the mixture separates or curdles then heat is too high.
- Do not leave the custard unattended while cooking.
- The custard will take anywhere from 5-15 minutes to thicken depending on the type/size of saucepan used. It is best to use a low heat as different stove types will vary greatly in heat.
- Once the custard has thickened, transfer the mixture into a heat proof bowl. Allow the mixture to cool before placing into the refrigerator, cover and chill for several hours before use.

Care & Cleaning

- Always turn the power off and remove the plug from the power outlet after use and before cleaning.
- Wash the freezer canister in warm soapy water. This can be done if the unit is still partially frozen; it will not damage or crack the unit. However, if the unit is still practically frozen you must dry immediately as the water will start to freeze inside the unit. Be sure to rinse and dry thoroughly. Do not use abrasive scouring pads, powders or cleaners.

NOTE: Never replace the freezer canister in the Freezer if it is still wet.

- Pouring Hole Cover, Paddle and Top and Bottom Canister Latches may be placed on the top shelf of the dishwasher. Paddle Extender may be placed in the cutlery tray of dishwasher.
 - The Motor Unit can be cleaned by using a damp cloth.
- NOTE:** Never immerse Motor unit in water.
- Do not use sharp objects or utensils inside the freezer canister. Sharp objects will scratch and damage the inside of the freezer canister. A plastic, wooden or rubber spoon, or spatula, may be used when the appliance is in the 'OFF' position.

Recipes

Basic Vanilla Ice Cream 1

Makes 1 litre

Cooking & Prep time:
30 minutes + chilling time

- 1 cup (250ml) milk
- 2 cups (500ml) thickened cream
- 1 vanilla bean, seeds scraped*
- 5 egg yolks
- ½ cup (110g) caster sugar

1. Combine milk and cream in a saucepan. Split vanilla bean in half lengthways. Scrape out the seeds; add the pod and the seeds to the saucepan. Bring the mixture to simmering point over low heat.
2. Whisk egg yolks and sugar together for 3-4 minutes, until light and creamy.
3. Gradually whisk in hot milk mixture into yolk mixture until well combined.
4. Return the mixture into a clean saucepan and cook, stirring constantly with a wooden spoon, over low heat until mixture thickens and coats the back of the spoon.

Tip: For further tips on custard making see page 10.

5. Transfer mixture to a bowl and remove vanilla pod. Allow to cool before placing in the fridge to chill for 4-6 hours or until very cold.
6. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
7. Mixture will be ready once the paddle starts to rotate in the other direction.

*Vanilla bean can be substituted with 2 teaspoons of vanilla essence

Variations to this recipe:

Chocolate Ice Cream Makes approx. 1 litre

Cooking & Prep time:
35 minutes + chilling time

- 1 quantity basic vanilla ice cream 1
- 150g chopped dark chocolate

1. Follow steps 1-7 for Basic Vanilla Ice cream 1, heating the dark chocolate with the cream and milk.
2. Omit vanilla bean.

Rum & Raisin Ice Cream Makes approx. 1 litre

Cooking & Prep time:
35 minutes + chilling time

- 1 quantity basic vanilla ice cream 1
- ⅓ cup (55g) chopped raisins
- 2 tablespoons rum

1. Follow steps 1-7 for Basic Vanilla Ice cream 1. Omit vanilla bean.
2. Soak chopped raisins with rum for 1 hour before churning.
3. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add basic vanilla ice cream mixture through the pouring hole.
4. Once mixture has reached the top of the paddle pour in soaked raisins and rum. Churn for a further 5 minutes or until the paddle starts to rotate in the other direction.

Recipes continued

Peppermint Choc Chip Ice Cream

Makes approx. 1 litre

Cooking & Prep time:
35 minutes + chilling time

- 1 quantity basic vanilla ice cream 1
- 1-2 teaspoons peppermint essence
- ⅓ cup finely chopped dark chocolate
- green food colouring (optional)

1. Follow steps 1-7 for Basic Vanilla Ice Cream 1. Omit vanilla bean.
2. Add peppermint essence to mixture before churning.
3. Add finely chopped chocolate and food colouring to the custard mixture through the pouring hole when churning.

Basic Vanilla Ice Cream 2 Makes approx. 800ml

Cooking & Prep time:
30 minutes + chilling time

- 1 cup (250ml) milk
- 1 cup (250ml) thickened cream
- 1 Vanilla Bean*
- 4 egg yolks
- ½ cup (110g) caster sugar

1. Combine milk and cream in a saucepan. Split vanilla bean in half lengthways. Scrape out the seeds and add the pod and the seeds to the saucepan. Bring the mixture to simmering point over low heat.
2. Whisk egg yolks and sugar together for 3-4 minutes, until light and creamy.
3. Gradually whisk in hot milk mixture into yolk mixture until well combined.
4. Return the mixture into a clean saucepan and cook, stirring constantly with a wooden spoon, over low heat until mixture thickens and coats the back of the spoon. Do not allow mixture to boil or it will curdle.

5. Transfer mixture to a bowl and remove vanilla pod. Allow to cool before placing in the fridge for 4-6 hours or until very cold.

Tip: For further tips on custard making see page 10.

6. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
7. Mixture will be ready once the paddle starts to rotate in the other direction, this will take about 25 minutes.

*Vanilla bean can be substituted with 2 teaspoons of vanilla essence

Variations to this recipe:

White Chocolate Ice Cream

Makes approx. 1 litre

Cooking & Prep time:
35 minutes + chilling time

- 1 quantity basic vanilla ice cream 2
- 150g chopped white chocolate
- 50g finely chopped white chocolate, extra

1. Follow steps 1-7 for Basic Vanilla Ice Cream 2, heating the white chocolate with the cream and milk. Omit vanilla bean.
2. Add finely chopped chocolate to the custard mixture through the pouring hole when churning.

Coffee Ice Cream Makes approx. 850ml

Cooking & Prep time:
35 minutes + chilling time

- 1 quantity basic vanilla ice cream 2
- 60ml strong fresh espresso

1. Follow steps 1-7 for Basic Vanilla Ice cream 2, heating the coffee with the cream and milk.
2. Omit vanilla bean.

Recipes continued

Mango Ice Cream Makes approx. 1 litre

Cooking & Prep time:
40 minutes + chilling time

1 quantity basic vanilla ice cream 2
300g fresh or frozen mango flesh, pureed

1. Follow steps 1-7 for Basic Vanilla Ice cream 2. Omit vanilla bean.
2. Once custard is cold, stir through mango puree and chill until ready to churn.

Strawberry Ice Cream Makes approx. 1 litre

Cooking & Prep time:
50 minutes + chilling time

1 quantity basic vanilla ice cream 2
500g strawberries, hulled
¼ cup (55g) caster sugar

1. Follow steps 1-7 for Basic Vanilla Ice cream 2 adding strawberry mixture in step 6. Omit vanilla bean.
2. To make strawberry mixture process strawberries in a food processor until smooth. Press mixture through a fine sieve; discard seeds.
3. Place strawberry puree and extra sugar in a saucepan and stir over a low heat until the sugar has dissolved. Increase heat and boil, stirring occasionally, for about 8 minutes or until the mixture reduced to 1 cup. Transfer to a heatproof bowl or jug; chill for 4-6 hours or overnight.
4. Once custard is cold; stir through strawberry mixture and chill until ready to churn.

Choc Hazelnut Ice Cream Makes approx. 900ml

Cooking & Prep time:
35 minutes + chilling time

1 quantity basic vanilla ice cream 2
¼ cup chocolate hazelnut spread
4 Ferrero Rocher Chocolates

1. Follow steps 1-7 for Basic Vanilla Ice cream 2, heating the hazelnut spread with the cream and milk. Omit vanilla bean.
2. Place chocolates into a small clean plastic bag and crush with a mallet or rolling pin. Add to the custard mixture through the pouring hole when churning.

Quick Mix Vanilla Ice Cream Makes approx. 1 litre

Cooking & Prep time:
5 minutes + chilling time

1½ cups (375 ml) milk
200g condensed milk
¾ cup (180ml) cream
1 teaspoon vanilla essence

1. Combine milk, condensed milk, cream and vanilla essence together in a bowl; mix well.
2. Refrigerate mixture until completely chilled.
3. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
4. Mixture will be ready once the paddle starts to rotate in the other direction.

Recipes continued

Variations to this recipe: (Quick Mix Vanilla)

Choc-Nut Praline Ice-cream Makes approx. 1.25 litres

Cooking & Prep time:
30 minutes + chilling time

1 quantity Quick Mix Vanilla Ice-Cream
1 cup (220g) caster sugar
½ cup (125ml) water
½ cup (100g) dark chocolate, chopped finely
¼ cup (35gm) toasted flaked almonds

1. Follow steps 1-4 for Quick Mix Vanilla Ice-Cream.
2. Meanwhile, combine sugar and water in a small heavy-based saucepan; stir over low heat until sugar dissolves. Increase heat; boil, uncovered, without stirring, about 10 minutes or until syrup is a deep golden colour.
3. Pour toffee mixture into a 20cm x 20cm square pan; stand 5 minutes. Sprinkle chocolate over hot toffee, spreading with a spatula as chocolate melts, to completely cover toffee. Sprinkle with almonds; refrigerate for approximately 20 minutes or until set. Break choc-nut praline into shards; pulse in a food processor until coarsely chopped.
4. Once the ice cream is finished stir through 1 cup of the praline mixture; stir to combine. Spoon into a plastic container; cover and freeze until firm.
5. Sprinkle the remaining choc-nut praline on top of ice-cream when serving.

Tip: The Basic Vanilla ice cream recipes can also be used for this recipe.

Rocky Road Ice Cream Makes approx. 1.2 litres

Cooking & Prep time:
10 minutes + chilling time

1 quantity Quick Mix Vanilla Ice Cream
1 cup (50g) mini marshmallows
100g dark chocolate, chopped coarsely
¼ cup (20g) shredded coconut, toasted

1. Follow steps 1-4 for Quick Mix Vanilla Ice Cream.
2. Combine marshmallow, chocolate, coconut in a large bowl.
3. Once the ice cream is finished stir through the marshmallow mixture. Spoon into a plastic container; cover and freeze until firm.

Tip: The Basic Vanilla ice creams recipe can also be used for this recipe.

Recipes continued

Low Fat Vanilla Ice Cream **Makes approx. 750ml (630g)**

Cooking & Prep time:
20 minutes + chilling time

- 1½ teaspoons gelatine
- 2 tablespoons water
- 400ml skim milk
- 100ml thickened light cream 18% milk fat
- ¼ cup (55g) caster sugar
- 2 teaspoons vanilla essence

1. Mix gelatine with boiling water and stir until dissolved.
2. Combine milk, cream, sugar and vanilla in a saucepan. Bring the mixture to simmering point over low heat; stirring occasionally until sugar dissolves.
3. Remove from heat and add the gelatine mixture; mix well.
4. Refrigerate until completely chilled.
5. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
6. Mixture will be ready once the paddle starts to rotate in the other direction.

Nutritional information per 100g

Variations to this recipe:

Low Fat Chocolate Ice Cream **Makes approx. 750ml (685g)**

Cooking & Prep time:
20 minutes + chilling time

- 1 quantity Low Fat Vanilla Ice Cream
- ¼ cup (30g) cocoa powder
- ¼ cup (55g) caster sugar

1. Follow steps 1-6 for Low Fat Vanilla Ice-Cream, gently whisking the cocoa powder and sugar into the hot milk until dissolved.

Nutritional information per 100g

560kj; 3.4g total fat; 2.2g sat fat; 4.4g protein; 21g carbohydrates; 20g sugars

Low Fat Strawberry Ice-Cream **Makes approx. 1 litre (1180g)**

Cooking & Prep time:
40 minutes + chilling time

- 1 quantity Low Fat Vanilla Ice Cream
- 500g strawberries, hulled
- ¼ cup (55g) caster sugar

1. Follow steps 1-6 for Low Fat Vanilla Ice-Cream adding strawberry mixture in step 5.
2. To make strawberry mixture, process strawberries in a food processor until smooth. Press mixture through a fine sieve; discard seeds.
3. Place strawberry puree and extra sugar in a saucepan and stir over a low heat until the sugar has dissolved. Increase heat and boil, stirring occasionally, for about 8 minutes or until the mixture has reduced to 1 cup. Transfer to a heatproof bowl or jug; chill for several hours.
4. Combine the ice cream mixture and strawberry mixture in a jug.

Reduced Fat Basic Vanilla Ice cream **Makes 1 litre (1000g)**

Cooking & Prep time:
30 minutes + chilling time

This recipe is 40% less fat than our original Basic Vanilla Ice Cream 1 recipe on page 12

- 1 cup (250ml) skim milk
- 2 cups (500ml) thickened light cream 18% milk fat
- 1 vanilla bean, seeds scraped*
- 5 egg yolks
- ½ cup (110g) caster sugar

1. Combine milk and cream in a saucepan. Split vanilla bean in half lengthways. Scrape out the seeds; add the pod and the seeds to the saucepan. Bring the mixture to simmering point over low heat.
2. Whisk egg yolks and sugar together for 3-4 minutes, until light and creamy.
3. Gradually whisk in hot milk mixture into yolk mixture until well combined.
4. Return the mixture into a clean saucepan and cook, stirring constantly with a wooden spoon, over low heat until mixture thickens and coats the back of the spoon.

Tip: For further tips on custard making see page 10.

5. Transfer mixture to a bowl and remove vanilla pod. Allow to cool before placing in the fridge to chill for 4-6 hours or until well chilled.
6. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
7. Mixture will be ready once the paddle starts to rotate in the other direction.

*Vanilla bean can be substituted with 2 teaspoons of vanilla essence

Nutritional information per 100g

787kj; 12.5g total fat; 7.4g sat fat; 4.7g protein; 15g carbohydrates; 15g sugars

No Added Sugar Ice Cream **Makes approx 1 litre (740g)**

This recipe is also low in fat. We used CSR Smart sugar for this recipe but if using another sugar replacement use ½ cup.

Cooking & Prep time:
10 minutes + chilling time

- 1 cup (250 ml) Evaporated Skim milk
- ¼ cup sugar replacement
- 1½ cups (375 ml) skim milk
- 4 egg yolks
- 2 teaspoons vanilla essence

1. Combine ingredients in a large mixing bowl and mix well.
2. Refrigerate mixture until completely chilled.
3. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
4. Mixture will be ready once the paddle starts to rotate in the other direction.

Nutritional information per 100g

328kj; 2.8g total fat; 0.9g sat fat; 6.8g protein; 6.5g carbohydrates; 6.5g sugars

GELATO

There are many different styles of gelato; we have chosen two styles, sugar syrup and custard based. Sugar syrup gelato has a light refreshing taste with a hint of creaminess to them while a custard based gelato has a creamier texture but is lighter than ice cream.

When making sugar syrup based gelato in Snowy it is essential that the freezer canister is as cold as possible. In most cases the paddle may not reverse when making sugar syrup based gelato. To gauge if your gelato is ready, wait until the mixture comes close or to the top of the paddle or looks quite frozen. This time will vary depending on temperature of ingredients, freezer canister and ambient temperature.

Sugar Syrup makes approximately 1 cup

Cooking & Prep time:

10 minutes + chilling time

1 cup (250ml) water
½ cup (110g) caster sugar

1. Place the water and sugar in a small saucepan.
2. Stir over a low heat until the sugar dissolves. Bring to the boil and cook for 2 minutes. Remove from heat. Cool to room temperature. Refrigerate for several hours or overnight.
3. Sugar syrup will keep for several weeks stored in an airtight container in the refrigerator.

Green Apple Gelato makes approx. 750ml

Cooking & Prep time:

20 minutes + chilling time

1 quantity sugar syrup
3 small green apples, juiced
2 tablespoons freshly squeezed lemon juice
⅔ cup (160ml) thickened cream

1. Follow steps 1-2 for sugar syrup, including the apple and lemon juice into the mixture.
2. Strain mixture through a fine sieve. Refrigerate for several hours or overnight.
3. Whisk together the apple syrup and cream in a jug.
4. Position the Frozen dessert maker as directed on pages 6-8. Turn unit on; add mixture through the pouring hole.
5. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened, this will take about 35 minutes.

Tip: For a slightly greener colour use 1-2 drops of green food colouring.

Recipes continued

Lemon gelato Makes approx 750ml

Cooking & Prep time:

20 minutes + chilling time

1 quantity sugar syrup
¼ cup lemon zest
⅔ cup (160ml) freshly squeezed lemon juice
⅔ cup (160ml) thickened cream

1. Follow steps 1-2 for sugar syrup, including the lemon zest and juice into the mixture.
2. Strain mixture through a fine sieve. Refrigerate for 4-6 hours or overnight.
3. Whisk together the lemon syrup and cream in a jug.
4. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
5. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

Ruby red grapefruit gelato Makes approx. 750ml

Cooking & Prep time:

20 minutes + chilling time

1 quantity sugar syrup
1 tablespoon grated ruby red grapefruit zest
⅔ cup (160ml) freshly squeezed ruby red grapefruit juice
⅔ cup (160ml) thickened cream
1-2 drops red food colouring, optional

1. Follow steps 1-2 for sugar syrup, including the grapefruit zest and juice into the mixture.
2. Strain mixture through a fine sieve. Refrigerate for 4-6 hours or overnight.
3. Whisk together the ruby red grapefruit syrup, cream and red food colouring in a jug.

4. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
5. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

Custard Based Gelato

Gelato Custard base Makes approx. 950ml

Cooking & Prep time:

30 minutes + chilling time

2 cup (500ml) milk
½ cup (125ml) light cream
5 egg yolks
½ cup (110g) caster sugar

1. Combine milk and cream in a saucepan. Bring the mixture to simmering point over low heat.
 2. Whisk egg yolks and sugar together for 3-4 minutes, until light and creamy.
 3. Gradually whisk in hot milk mixture into yolk mixture until well combined.
 4. Return the mixture into a clean saucepan and cook, stirring constantly with a wooden spoon, over low heat until mixture thickens and coats the back of the spoon. Do not allow mixture to boil or it will curdle.
- Tip:** For further tips on custard making see page 10.
5. Transfer mixture to a bowl; allow to cool before placing in the fridge to chill for several hours.
 6. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
 7. Mixture will be ready once the paddle starts to rotate in the other direction.

Gelato variations

Chocolate Nougat Gelato makes approx. 1 litre

Cooking & Prep time:

35 minutes + chilling time

1 quantity gelato custard base

80g Toblerone chocolate, chopped

50g chopped Toblerone chocolate, extra

1. Follow steps 1-7 for gelato custard base. Heating the 80g chocolate with the cream and milk.
2. Add finely chopped chocolate to the gelato mixture through the pouring hole when churning.

Passionfruit Gelato makes approx. 1 litre

You will need approximately 4 passionfruit for this recipe

Cooking & Prep time:

30 minutes + chilling time

1 quantity gelato custard base

½ cup passionfruit pulp

1. Follow steps 1-7 for gelato custard base.
2. Stir through passionfruit before churning.

Pistachio Gelato makes approx. 1 litre

Cooking & Prep time:

40 minutes + chilling time

1 quantity gelato custard base

⅓ cup (50g) roasted and chopped pistachios

1. Follow steps 1-7 for gelato custard base.
2. Add chopped pistachios to the gelato mixture through the pouring hole when churning.

SORBET

A delicious dairy and fat free dessert which is a perfect way to finish off a meal or enjoy as a treat on a hot day! Sorbets have a sugar syrup base.

When making sorbets in Snowy it is essential that the freezer canister is as cold as possible. In most cases the paddle will not reverse when making sorbets. To gauge if your sorbet is ready, wait until the mixture comes close to the top of the paddle or looks quite frozen. This time will vary depending on temperature of ingredients, freezer canister and ambient temperature.

Sugar Syrup makes approx. 1 cup

Cooking & Prep time:

10 minutes + chilling time

1 cup (250ml) water

½ cup (110g) caster sugar

1. Place the water and sugar in a small saucepan.
2. Stir over a low heat until the sugar dissolves. Bring to the boil and cook for 2 minutes. Remove from heat and allow to cool at room temperature before refrigerating for a 2-3 hours or until cold.

Recipes continued

Mixed Berry Sorbet Makes approx. 750ml

Cooking & Prep time:

20 minutes + chilling time

500g frozen mixed berries, thawed

1½ tablespoons lime juice

1 quantity sugar syrup

1. Place thawed berries and their juices in a food processor and puree until smooth. Push berries through a sieve to remove the seeds. Chill.
2. Combine the sugar syrup, berries and lime juice and stir to combine.
3. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
4. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

Watermelon Sorbet Makes approx. 1 litre

You will need 1.2kg watermelon for this recipe

Cooking & Prep time:

10 minutes + chilling time

1 quantity sugar syrup

2 cups (500ml) freshly juiced watermelon

2 tablespoons lemon juice

1. Combine the sugar syrup, watermelon and lemon juice and stir to combine.
2. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
3. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

Fresh Pineapple and Mint Sorbet Makes approx. 750ml

You will need approximately 1 pineapple for this recipe

Cooking & Prep time:

10 minutes + chilling time

1 quantity sugar syrup

2½ cups freshly juiced pineapple juice

1 tablespoon finely shredded mint

1. Combine the sugar syrup, pineapple juice and shredded mint and stir to combine.
2. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
3. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

FROZEN YOGURT

Vanilla Frozen Yogurt makes approx. 1 litre

Cooking & Prep time:

5 minutes + chilling time

550g vanilla yogurt

260ml milk

135g caster sugar

½ teaspoon vanilla extract

1. Whisk ingredients together in a large jug.
2. Refrigerate for 1 hour or until well chilled.
3. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
4. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.

Mango Swirl

Makes approx. 1 litre

Frozen Yogurt

Cooking & Prep time:

15 minutes + chilling time

400g mango flesh, fresh or frozen

375g low fat vanilla yogurt

175ml low fat milk

90g caster sugar

1. Blend or process mango flesh until smooth. Reserve 150g of the flesh to be swirled through the frozen yogurt at the end.
2. Using an electric mixer, mix the remaining mango with the yogurt, milk and sugar until well combined.
3. Return mix to fridge until well chilled.
4. Position the Frozen dessert maker as directed on pages 7-8. Turn unit on; add mixture through the pouring hole.
5. Mixture will be ready once the paddle starts to rotate in the other direction or has thickened.
6. Turn unit off; remove lid and paddle. Using a spatula gently fold through the remaining mango pulp just enough to give a swirled effect. Carefully spoon mixture into a plastic 1 litre container; freeze until ready to serve.
